

07.2 — Manager User Guide

For: HR managers, department heads, and team leads at Haritha Hospitals. **Goal:** Run your team's roster, leave, attendance, and payroll approvals without surprises.
Last updated: 2026-08-29 **Pre-req reading:** 07.1 Employee User Guide, 02.1 Shift Management Workflow, 04.2 Daily Ops Runbook

Welcome, HR Manager

You are the operational hub for your department or HR function. The HRMS gives you the tools to:

- See your team's roster at a glance
- Approve leave, attendance corrections, shift swaps
- Track headcount, attendance %, leave liability
- Process monthly payroll with sign-off
- Stay compliant (PF, ESI, professional tax, audits)

Core principle: *approve fast, document everything.* Every approval is an audit trail entry. Every rejection needs a reason.

Your dashboard

When you log in, the **Home** dashboard shows manager-relevant widgets:

- **Pending Approvals** — count of Leave Applications + Attendance Requests awaiting your action
- **Team on Shift Today** — headcount by department
- **Today's Absentees** — flagged before 10:00 IST (auto-generated from missing check-ins)
- **This Month's Payroll Status** — Draft / Submitted / Approved
- **Compliance Due** — PF ECR generation, ESI return, professional tax filing deadlines
- **Recent Activity** — last 10 actions by your team

Click any widget to drill down. The **Pending Approvals** widget is your daily starting point.

Team management

Viewing your team

Two ways to see the people who report to you:

1. **Employee list (filtered):**
 - Human Resources → Employee → filter Department = <your department>
 - Add column Reports to = <you> for direct reports only
2. **Department tree view:**
 - Human Resources → Department → open your department
 - Tab **Employees** shows everyone, with reporting hierarchy

Team member profiles

Click any employee name to open their full record. Useful tabs:

- **Personal** — name, contact, emergency contact
- **Employment** — department, designation, date of joining, employment type
- **Salary** — salary structure, base, current gross (HR/payroll only)
- **Leave** — current balances, history
- **Attendance** — last 30 days summary
- **Shift Assignment** — current roster block

Permission note: You see salary for your direct reports only. Aggregate department salary is visible; individual non-report salary is not.

Onboarding a new employee (manual checklist)

The system has no wizard — you follow this checklist:

1. **HR creates the Employee record** (Human Resources → Employee → New):
 - First/Last Name, Gender, DOB
 - Date of Joining, Department, Designation
 - Employment Type (Full-time / Part-time / Contract / Intern)
 - Holiday List assignment
 - Reports To = manager name
2. **IT creates the User account** (Settings → User → New):
 - Email (company standard)
 - Role: Employee + Department-specific role
 - Send invite (system emails temp password)
3. **Payroll sets the Salary Structure** (assign a structure template).
4. **You set the Shift Assignment** (first 30 days default = day shift).
5. **Add to relevant rosters** — /hr/roster reflects shift assignments.
6. **Issue laptop / ID card / biometric enrollment** — IT handles.

Time to onboard: ~30 min if all data is ready. Most delays are from missing docs (Aadhaar, PAN, photo).

Offboarding (exit process, deactivate user)

When an employee resigns / is terminated:

1. **Mark Relieving Date** in Employee record → Status becomes “Inactive” on that date.
2. **Clear leave balance** — leave encashment decision (HR/payroll).
3. **Run Full & Final Settlement** — payroll team. Last payslip includes F&F.
4. **Revoke user** — Settings → User → set **Enabled = 0** (don’t delete, archive).
5. **Remove from shift assignments** — system auto-excludes inactive employees from roster.
6. **Hand-over** — return laptop, ID card, biometric data deletion request.
7. **Update audit log** — IT logs the offboarding with date + reason.

Don’t delete the Employee record. Inactive flag preserves historical reports (attendance, payslips). Deletion breaks reports and audit.

Roster management

Viewing team roster

1. Go to <https://pberpprod.duckdns.org/hr/roster>.
2. Filter: **Department = , Date Range = next 2 weeks** (typical planning horizon).
3. Color-coded cells show shift per person per day.

Bulk shift assignment (Shift Assignment DocType)

For assigning next month's roster to the whole team:

1. Human Resources → Shift Assignment → New.
2. Fill:
 - **Company** = Haritha Hospitals
 - **Shift Type** = e.g. G0900R0900 (General 09-18)
3. In the **Employees** child table, add rows for each team member:
 - **Employee** = name
 - **Start Date, End Date** = the assignment window (e.g. 1 Sep – 30 Sep)
4. Save → Submit.

Bulk import tip: Use the “Add Multiple” button on the child table. Type 5-10 employee names quickly. Faster than CSV import for small teams.

Reassigning shifts

Three scenarios:

1. **Last-minute swap (same day)** — open the original Shift Assignment, click **Cancel**, create new ones. Or use **Shift Request** DocType if your team uses it.
2. **Future change** — open the future Shift Assignment, edit the date/shift, save.
3. **Bulk change** — create new Shift Assignments for the date range, old ones cancel automatically (via overlap validation).

Handling shift swap requests

Employees request swaps via **Shift Request** (Human Resources → Shift Request):

1. View pending requests → click each.
2. See who wants to swap with whom, which dates, which shifts.
3. **Approve** if both are competent for the shift (especially clinical roles).
4. The system creates corresponding Shift Assignments.

Red flag: Frequent swap requests from the same employee may indicate roster dissatisfaction — talk to them.

Holiday impact on shifts

When a holiday falls on a scheduled shift:

- Employees who work that day earn **Comp-Off** (1 per holiday shift).
- HR or payroll credits Comp-Off automatically via **Leave Ledger Entry** (system-side).
- You see it in the employee's Comp-Off balance within 24 hours.

Verify monthly: run **Leave Ledger Entry** report filtered by leave type = “Compensatory Off” — it should match your manual holiday roster.

Attendance management

Viewing team attendance

1. Human Resources → Attendance → filter Department = <X>, Attendance Date = today.
2. List view shows each employee's check-in, check-out, working hours, status.

Or for a trend:

1. Human Resources → Attendance → Report → **Attendance Summary** (date range, department).
2. Exports to Excel.

Approving attendance corrections

Employees file **Attendance Request** when check-in fails:

1. Home → **Pending Approvals** widget → click Attendance Request.
2. Each row shows: employee, date, requested status, reason.
3. **Approve** if reason is valid (network outage, biometric failure, forgot phone).
4. **Reject** with a reason if the pattern looks suspicious (daily requests from same person).

Rule of thumb: Approve if employee has <2 requests in 30 days. Escalate to HR if >3.

Marking manual attendance (when checkin missed)

When you know an employee worked but no check-in exists:

1. Human Resources → Attendance → New.
2. Fill: employee, date, status = Present, working hours (estimate), remark = "Manual: ".
3. Save → Submit.

Limit: You can mark up to 7 days back. Beyond that, payroll team must do it (with HR approval).

Auto Attendance review

The system auto-creates Attendance from Employee Checkin records:

1. Verify it ran: `bench --site pberpprod console → check last_sync_of_checkin on Shift Type`.
2. Review mismatches: Human Resources → Auto Attendance → filter by today.
3. Manually fix any "Skipped" entries (usually due to holiday / leave overlap).

See 02.1 Shift Management Workflow for the full auto-attendance logic.

Leave management

Approving / rejecting leave applications

1. Home → Pending Approvals → Leave Application.
2. Each row: employee, leave type, dates, days, reason.
3. **Before approving, check:**
 - Leave balance is sufficient
 - No overlap with approved leave for same dates
 - Adequate coverage (other team members not all on leave)
 - Critical dates (month-end, audit week, surgery block)
4. **Approve** or **Reject** (rejection needs a reason — recorded in audit log).

Tie-break: If two people request the same dates, approve the one who applied first. If equal timestamp, ask them to resolve.

Leave calendar view (team-wide)

1. Human Resources → Leave Application → Calendar (top-right toggle).
2. Color = leave type. Click any entry to see details.

Useful for spotting coverage gaps.

Leave balance tracking

1. Human Resources → Leave Type → open a type → tab **Ledger**.
2. Shows every employee's accrual, usage, balance.
3. Or per-employee: Employee record → Leave tab.

Carry forward rules

Configurable per Leave Type. India defaults:

Leave Type	Carry Forward Rule
Casual Leave	None — lapses 31 Mar
Sick Leave	None — lapses 31 Mar
Earned Leave	Up to 30 days carry forward
Comp-Off	Up to 30 days carry forward

Verify yearly: Run **Leave Ledger Entry** report on 1 April — EL balances should reset to “carried forward” portion. If not, escalate.

Payroll oversight

Reviewing salary slips before processing

Before payroll run (typically 28th–30th of each month):

1. Human Resources → Salary Slip → filter Company = Haritha Hospitals, Month = <current>.
2. Open each slip, verify:
 - **Working days** matches actual attendance + paid leave
 - **Loss of pay** = unpaid leave days × (gross / 30)
 - **PF** = 12% of Basic
 - **ESI** = 0.75% of Gross (if applicable)
 - **PT** = state rate (₹200 for Karnataka, ₹0 if income < threshold)
 - **TDS** matches projected monthly tax
3. **Flag anomalies** — wrong Basic, missing deduction, double-credit — to payroll team.
4. Payroll team runs **Process Payroll** after your sign-off.

Salary Structure management

Each employee has a Salary Structure assigned:

1. Human Resources → Salary Structure → New (or edit existing).
2. Components: Basic, HRA, Allowances (list), Deductions (list).
3. **Approve** → assigns to employee.

Frequency: Annual review (April). Off-cycle changes need HR + MD approval.

Reporting payroll anomalies

Common issues:

- Wrong basic → check Salary Structure assignment
- Missing PF → check employee has PF applicable flag
- Excess TDS → check investment declarations (Form 12BB)
- Wrong net pay → recompute from components

Always escalate to payroll team via the Payroll Issue Tracker (separate spreadsheet) — do not edit payslips directly.

Reports

HR Analytics dashboard

/app/hr (or Human Resources → HR Analytics):

- Headcount by department, designation, gender
- New joiners / exits (last 30 / 90 / 365 days)
- Average tenure
- Leave utilization

Attendance summary

Human Resources → Reports → **Attendance Summary** (or /app/attendance-summary):

- Date range, department filter
- Per-employee present / absent / half-day / on-leave counts
- Late entries / early exits flagged

Leave summary

Human Resources → Reports → **Leave Summary**:

- Date range, department, leave type
- Per-employee leave taken + balance
- Export to Excel for payroll input

Department-wise headcount

Human Resources → Employee → filter Department → Group by **Designation**:

- Shows count per role per department
- Useful for org planning

Custom report builder

For ad-hoc queries:

1. Human Resources → Reports → **Report Builder** → New.
 2. Pick DocType (Employee, Attendance, Leave Application, Salary Slip).
 3. Add columns, filters, group-by.
 4. Save as a custom report (visible to you + HR).
-

Compliance

Statutory reports (India-specific)

Report	Frequency	Where
PF ECR (Employee Contribution Report)	Monthly	bench --site X execute erp-next.regional.india.setup.generate_pf
ESI Contribution	Monthly (twice-yearly return)	Payroll → ESI Report
Professional Tax	Monthly (state-specific)	Payroll → PT Report
Form 24Q (TDS)	Quarterly	Payroll → TDS → Form 24Q
Form 16 (TDS Certificate)	Annual (after year-end)	Payroll → TDS → Form 16

Deadlines: PF by 15th, ESI by 15th, PT by end-of-month. Mark in your calendar.

Audit trail

Every create / edit / submit / cancel of a HR record logs:

- **Who** did it
- **When** (timestamp)
- **What** changed (diff view)
- **IP address**

Access via: Human Resources → → open record → **Audit Trail** (top-right dropdown).

Retention: 8 years minimum (India compliance). Don't archive earlier than that.

Common tasks (quick reference)

Task	Path	Tip
Approve leave	Home → Pending Approvals	Check coverage before approving
Assign shifts (bulk)	Shift Assignment → New	Use child table "Add Multiple"
View team roster	/hr/roster → filter Department	Default = current week
Mark manual attendance	Attendance → New	Max 7 days back
View payslips	Salary Slip → filter	Pre-payroll review by 28th
Run attendance report	Reports → Attendance Summary	Export to Excel
Approve attendance correction	Home → Pending Approvals	Check frequency before approving
Offboard employee	Employee → set Relieving Date → IT revokes user	Don't delete record
Onboard employee	Employee → New → User → Salary Structure	~30 min checklist

Escalation

Issue	Handle yourself	Escalate to admin
Single employee data fix	☐	
Bulk roster publish	☐	
Shift type creation		☐ (admin-only)
Custom field on Employee		☐
Salary structure template change		☐ (needs MD approval)
User not getting email invites		☐ (IT)
Page won't load / 500 errors		☐ (IT, P1)
Permission denied for routine action		☐ (role misconfig)
Statutory report format error		☐ (admin + payroll)
Backup integrity check		☐ (Daily Ops)
Bulk data import (>50 records)		☐ (use fixture / script)

When in doubt, escalate. Cheap to ask, expensive to fix wrong.
